

HAPPY SAUNA®
Wellness Today

Personal *SPA*

Personal SPA is a concept of small dimensions, ideal for creating a corner to pamper body and soul in private homes, hotel suites, beauty salons, luxury boats. Inside, it offers a variety of programs designed to test the benefits and virtues of the humid heat, lights, colours, aromas and your favourite music.

Personal SPA offers 6 different sensory experiences:

Steam Bath, with its toning and relaxing properties;

Chromo therapy with RGB led lighting system;

Aroma therapy through the diffusion of your favourite aromas;

Music therapy with MP3 system;

Cold mist, that sprays atomized herb-flavoured water, relaxing the mind and the tensions;

Tropical Rain that creates a wonderful feeling of relaxation, thanks to the water temperature of about 38° C and the tropical essences;

The equipment is completed by a refreshing shower and small recessing showers.

Construction features:

- Self-supporting cabin made of special insulating panels in EPS and aluminium (total thickness 4 cm), assembled through aluminium profiles;
- internal coating in Krion®, with decorative elements in tempered silkscreened glass;
- Panoramic door (width 130 cm) in tempered glass (thickness 10 mm), equipped with handle in Krion®;
- Stainless steel structures that hosts the shower head and the equipment for the emotional shower system (cold mist and tropical rain)

Standard equipment:

- low-consumption steam generator with essence dosing system;
- electronic touch-screen control board with automatic system for the management of: emotional showers, lighting and sound systems inside the cabin;
- internal RGB led lighting system (rear wall, ceiling and underbench mounted);
- music boxes;
- essences for aromatherapy (5 liters).

Technical features:

- External dimensions (cm): 200 L x 156 P x 225 H
- Minimum dimensions of the installation area (cm): 220 L x 300 P x 250 H
- Net weight: 820 Kg
- Voltage: 230 V – AC single-phase
- Max power consumption: 3,5 kW

Room features necessary for the correct installation of the cabin:

- the cabin has been designed to be installed in closed spaces, not subject to external atmospheric agents; the cabin has to be installed on finished floors (possibly tiled), perfectly horizontal; before assembling, it has to be verified that the floor and the ceiling of the room have a load resistance compatible with the weight of the cabin;
- the arrangements for the connection to the hot and cold water supply lines, to the drain system and to the electrical supply line are to be located inside the cabin, as indicated on the plan.

Installation:

- the installation of the “Personal SPA” must be performed by qualified technicians appointed by Happy Sauna.

NOT INCLUDED:

- Masonry works
- External coating
- Tiled floor
- ½” hot and cold water supply lines according to our working plan
- Drain system (pipes diam.50 mm) according to our working plan
- Electric supply line of proper rating
- All plumbing and electrical works, walling, painting, air conditioning and carpentry not part of the cabin and cabin supply.

The above mentioned service systems must be exactly provided as for the specifications produced by Happy Sauna. We take no responsibility for any faults deriving from service systems that do not conform to our specifications.
